

!Chess

Game instructions

Controls

Left click to select tiles and buttons

Right click to deselect tiles

Rules

Players take turns competing against each other following normal rules of chess with the addition of other interactions later in the game

Each turn players can either move a piece on the board or buy an upgrade from the buttons on the right of the board

Each upgrade can only be purchased once

Players can earn points to spend on buying upgrades by capturing enemy pieces

In addition to the normal rules of chess and movement of pieces, players can add pieces from other games (for now there is a Lance from the game Shogi)

- The Lance can only move in a straight line forwards

Capture the opponent's king to win the game

Pieces

Each piece is awards points when a player captures it:

- Pawn: 1
- Rook: 3
- Knight: 2
- Bishop: 2
- Queen: 5
- King: Wins the game
- Lance: 3

Upgrades

1st button – cost: 1 – add a pawn

2nd button – cost: 3 – expand the board by one tile on all sides

3rd button – cost: 3 – add a Lance from the game of Shogi

4th button – cost:5 – each player sacrifices a piece

Cheats

Press 1 - Infinite points

Press 2 - Can buy upgrades multiple times
